FRONT & REAR DIFF GEAR MESH ADJUSTMENT

THE LOCATION OF THE SHIM(S) DEPENDS ON WHETHER YOU ARE TRYING TO CLOSE OR OPEN THE GAP.

If there is too much or too little diff side play, this may create non-optimal gear mesh between the diff gear and the pinion drive gear. This is easily resolved by inserting 1 or 2 of the included thin shims behind a diff outdrive ball-bearing, depending on how much play there is.

TO CLOSE A WIDE GAP

TO OPEN A NARROW GAP

The logo for GT8.25, featuring the letters 'GT' in a stylized blue font with a yellow outline, followed by '8.25' in a silver, metallic-looking font with a blue outline.

The logo for 'BAG 13' is a yellow square with rounded corners and a black border. Inside the square, the word 'BAG' is written in a bold, black, sans-serif font. Below 'BAG', the number '13' is written in a larger, bold, black, sans-serif font. A black handle is attached to the top of the square.
